Pumpkin OS

Pumpkin OS : Trick or Treat

Pumpkin - a brand new OS welcomes you to experience your old Androids with an extremely efficient and newly built features.

Now's the time to add this spooky OS to your smartphone.

AN EERIE THEME

There is no way one cannot love spooky ideas nowadays.

Pumpkin's theme gives you the spookiest User Experience with all the creativity you can get.

Whether they're about ghosts, witches, or wolves, these customized icons all stay on the eerie theme.

But to really set the vibe, you'll need a goblin-approved playlist, too. XD

Your Personal Assistant

Meet **Grimmy - The Grim Reaper.**

Say Bye-Bye to your old boring notification styles.

Grimmy provides an entirely different user experience by giving extremely personalised notifications.

Get your things done even before you asked.

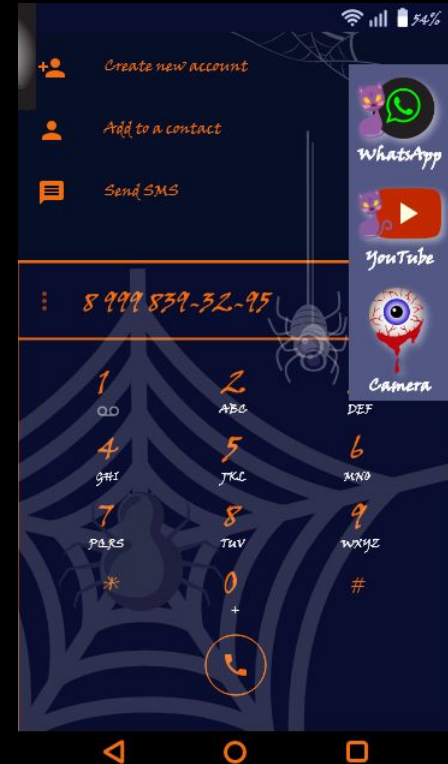

Feature: Quick Switch between Apps

Tap on the side bar while using any app to quickly switch between two apps.

No more wasting time to switch.

Just tap on switch bar and simply switch.
